The Technology Teacher Volume 59 Article Indices

TITLE INDEX

Activities that Teach about using Technology, *TTTe*, April 2000.

Addressing the Shortage of Tech Ed Teaching Professionals: Everyone's Business, September 1999, pp. 8-12.

Assessing Elementary School Design Portfolios, *TTTe*, November 1999.

Brain Research and Technology Education, April 2000, pp. 6-11.

Building Construction in China: Spanning the Centuries, *TTTe*, May/June 2000.

Controlling Wood Dust in a Multi-Purpose Technology Education Laboratory, *TTTe*, May/June 2000.

CNC Router Can Produce Vehicle Models More Quickly and Accurately, *TTTe*, March 2000.

Design and Technology in England: An Interview with Clare Benson, *TTTe*, November 1999.

Developing a Web Page: Ethics, Prerequisites, Design, and Layout, *TTTe*, February, 2000.

Employing Omnidirectional Visual Control for Mobile Robotics, February 2000, pp. 32-38.

Engaging Students in Service Learning Teaching Methodology, *TTTe*, March 2000.

Engineering, But How? March 2000, pp. 17-23.

Five Essential Components for Writing Design Briefs, *TTTe*, October 1999.

500-Newtons Less Negative Lift Helps Solar Car Finish Second in Sunrayce 99, *TTTe*, April 2000.

Future Visions of Technology Education, December/January 2000, pp. 32-35.

Hacky Sack Catapult Challenge, The, *TTTe*, February 2000.

Images Stronger than Words: Teaching Black and White Photography, March 2000, pp. 13-16.

Introduction of the Maryland Plan into the Greek Schools—Grades 7, 8, and 10, The, May/June 2000, pp. 25-28.

Invasion of the Flatlander Coalition, *TTTe*, December/January 2000.

Is Technology the "Best Hope" for Teaching Students about Mathematics and Science? September 1999, pp. 19-23.

ITEA's Strategic Plan and You, March 2000, pp. 5-8.

Laser Machining in Technology Education, May/June 2000, pp. 7-11.

Machining Giants, October 1999, pp. 12-16.

Maley Spirit of Excellence Breakfast Presentation, *TTTe*, September 1999.

Process Over Product, December/January 2000, pp. 10-14.

Professional Development: Take Charge!, October 1999, pp. 23-26.

Relating Technology Education to Trends in Elementary Education, November 1999, pp. 7-12.

Robotics: Design Through Geometry, November 1999, pp. 17-22.

Set-up Tool Means Quick Fix for CNC Students, April 2000, pp. 13-16.

Setting Strategic Direction for the New Millennium, December/January 2000, pp. 7-9.

Standards as a Catalyst for Change in Technology Education, February 2000, pp. 14-16.

Standards for Technological Literacy: A National Academies Perspective, The, March 2000, pp. 10-12.

Standards for Technological Literacy: Content for the Study of Technology, February 2000, pp. 8-13.

Taos Pueblo Students Hunt Leprechauns in Science and Language Arts, November 1999, pp. 13-16.

Teaching the History of Technology: A Cooperative Learning Activity, October 1999, pp. 7-11.

Teaching the Ugly Side of Consumerism, October 1999, pp. 27-30.

Technology Education Activity: Simple Java Scripts for Teaching Basic Computer Programming Skills, *TTTe*, October 1999.

Technology Education in Taiwan, *TTTe*, December/January 2000.

Technology Education Within the Framework of General Education: An Effective Process for Familiarizing Students with the World of Work, *TTTe*, September 1999.

Using Problem Solving to Teach the Disabled, May/June 2000, pp. 12-15.

Web Authoring—How Do I Get Started? September 1999, pp. 13-17.

RESOURCES IN TECHNOLOGY

Associations Online! March 2000, pp. 30-35.

Automated Production and Flexible Manufacturing Systems, October 1999, pp. 33-35.

Computer Numerical Control Lathe, The, December/January 2000, pp. 27-31.

Teaching Your Students about Technology Education as a Career, May/June 2000, pp. 29-33.

Programming the XBOT, November 1999, pp. 23-28.

XBOT—An Experimental Robot, September 1999, pp. 29-34.

XBOT: Programmed to Move, February 2000, pp. 25-31.

World Around Us: Biocontrol, The, April 2000, pp. 25-29.

LEARNING ACTIVITIES

Be Glad You're Not a Cyclops, March 2000, pp. 26-29.

Fifty Ways to Torture a What?, April 2000, pp. 21-24.

Getting in Touch with Your Inner Spacecraft, May/June 2000, pp. 20-24.

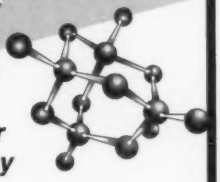
MATERIAL SCIENCE TECHNOLOGY



An ideal foundation course for Pre-Engineering, Materials and Processes, or Applied Science Technology

Solids, Metals, Ceramics, Polymers, and Composites form this five unit series from Energy Concepts, Inc. This state-of-the-art curriculum provides practical knowledge of the use and development of materials in today's world. Each unit in this exciting course combines theory with hands-on experience.

The curriculum and equipment for Material Science Technology is designed and packaged to make this unique program practical to implement in your school.
